

# BIOL 1407 General Biology II

Course Syllabus: Summer II 2018

---

"Northeast Texas Community College exists to provide responsible, exemplary learning opportunities."

**Professor Janet Zachary**

**Phone:** (903)434-8292

**Email:** jzachary@ntcc.edu

Office Hours	Monday	Tuesday	Wednesday	Thursday	Friday	Online
	12:30-1:00	12:30-1:00	12:30-1:00	12:30-1:00		

*The information contained in this syllabus is subject to change without notice. Students are expected to be aware of any additional course policies presented by the instructor during the course.*

**Catalog Course Description (include prerequisites):** This course is an introduction to the biological sciences for students who plan to major or minor in biology or pre-professional studies or to fulfill the laboratory science requirement of other majors. This course emphasizes the unity and diversity of life through the study of evolutionary phenomena, the origin of life, biodiversity, plant and animal evolution, the dynamics of ecosystems and the biosphere. Three hours of lecture and three hours of lab each week (animal dissection required) Pre-requisite: BIOL 1406

**Required Textbook(s):** McGraw-Hill: Biology, Volume 2 Text with Connect ISBN 1308806051

**Required Lab Manual:** NTCC General Biology II Lab Manual – Hearnon & Ward

**Recommended Reading(s):** Chapters 20-23, 27-35, 56-59 in lecture textbook; Units 1-12 in lab manual

**Other Course Requirements:**

- Notebook along with pens/pencils for note taking during class. Tests must be taken with #2 pencils.
- 7 scantrons (2 lab practicals, 4 lecture exams, 1 final exam)

**Student Learning Outcomes:**

1. Apply scientific reasoning to investigate questions, and utilize scientific tools such as microscopes and laboratory equipment to collect and analyze data.
2. Use critical thinking and scientific problem-solving to make informed decisions in the laboratory.
3. Communicate effectively the results of scientific investigations.
4. Demonstrate knowledge of modern evolutionary synthesis, natural selection, population genetics, micro and macroevolution, and speciation.
5. Distinguish between phylogenetic relationships and classification schemes.
6. Identify the major phyla of life with an emphasis on plants and animals, including classification, structural and physiological adaptations, evolutionary history, and ecological significance.
7. Describe basic animal physiology and homeostasis as maintained by organ systems.
8. Compare different sexual and asexual life cycles noting their adaptive advantages.
9. Illustrate the relationship between major geologic change, extinctions, and evolutionary trends.

## Lectures & Discussions:

CH 20 – Genes within Populations  
CH 21 – Evidence of Evolution  
CH 22 – Origin of Species  
CH 26 – The Origin and Diversity of Life

### EXAM 1

CH 27 – Viruses  
CH 28 – Prokaryotes  
CH 29 – Protists  
CH 32 – Fungi

### EXAM 2

CH 30 – Seedless Plants  
CH 31 – Seed Plants  
CH 33 – Animal Diversity & Body Plans  
CH 34 – Protostomes  
CH 35 – Deuterostomes

### EXAM 3

CH 56 - Community Ecology  
CH 57 - Dynamics of Ecosystems  
CH 58 - The Biosphere  
CH 59 - Conservation Biology

### EXAM 4

Final Exam Review

### FINAL EXAM

---

## Lab Units and Exercises:

UNIT 1 – Process of Science  
UNIT 2 – Evolution: Hardy Weinberg  
UNIT 3 – Evolution: Chromosomes  
UNIT 4 – Taxonomy & Bacteria  
UNIT 5 – Protists: Part I & II  
UNIT 6 – Fungi

### LAB PRACTICAL 1 (UNITS 1-6)

UNIT 7 – Seedless Plants  
UNIT 8 – Seed Plants  
UNIT 9 – Intro to Animals  
UNIT 10 – Protostome Animals  
UNIT 11 – Deuterostome Animals  
UNIT 12 – Population Ecology

### LAB PRACTICAL 2 (UNITS 7-12)

## Evaluation/Grading Policy:

### LECTURE: 70%

20% - Connect Homework Online  
60% - 4 Lecture Exams  
20% - Final Exam

### LABORATORY: 30%

60% - 2 Lab Practicals  
20% - 10 Lab Quizzes  
20% - 10 Lab Unit Reports

## Grade Assignment:

A = 90-100%  
B = 80-89%  
C = 70-79%  
D = 60-69%  
F = 0-59%

**Lecture Assignments:**

Weekly quizzes and/or homework will be assigned to check your understanding of classroom discussions and reading assignments. These are completed online in Connect. You will need to access Connect the first week of the semester and register your keycode to complete your assignments. Each assignment has a posted due date for completion. Due dates in Connect are firm – no makeups for missed homework.

**Lecture Tests/Exams:**

The lecture exams may include both objective questions (multiple choice, matching, etc.) over classroom discussions, notes, text materials, and readings as well as descriptive questions requiring detailed explanations over broad themes. Success on the exams is a function of anxiety regulation, test prep, study strategies, and studying for retention. Retention requires repetitions, which requires time! Scantrons and Bluebooks will be required for the major exams. Tests will not be made up for any reason without prior communication to your instructor. Late arrivals must complete exam by end of class time.

**Lab Practicals:**

A lab practical will be given twice during the semester. It is a live exam with stations that students will rotate through and answer questions associated with a visual from lab. Visuals may include images, specimens, lab equipment, data tables, graphs, experimental results, etc. A scantron is required for both lab practicals. Lab practicals will start 30 minutes after scheduled lab start time.

**Lab Quizzes:**

Weekly lab quizzes will be given the first 10 minutes of lab to check your understanding of laboratory discussions, experiments, and reading assignments. Quizzes will consist of 7 questions from the previous lab week based on terminology, experimental procedures, and experimental results. Quizzes will also consist of 3 questions from the current week topic. Students should read ahead and complete the PreLab Quiz to be prepared for lab as well as these final 3 questions. Quizzes will not be made up for late arrivals.

**Lab Reports:**

The lab reports from the lab manual are to be completed during lab and submitted at the end of the lab period. These, along with the quizzes, are designed to help you prepare for the Lab Practicals.

**Lecture Final Exam:**

A comprehensive final exam will be given during the time set forth by the college Final Exam Schedule. The final exam will consist of 100 objective questions (multiple choice, matching, etc.) from all chapters listed above. A scantron is required for the final exam.

**Withdraw Date**

The last day to withdraw from the course in **Monday, August 6**. Discontinuing with the course without officially dropping the course by this date will result in a grade earned, in most instances an "F". A stop in attendance does not equate to dropping the course.

**Student Responsibilities & Expectations**

Northeast Texas Community College is a "community of scholars". As scholars, you are expected to be respectful and courteous to your peers and instructors in both lecture and lab. Scholars are expected to be on time and remain for the duration of class. Scholars are expected to embrace anxiety and manage stress to be productive and responsible at all times. Scholars understand that they, and others around them, are pursuing very important goals in their life at this time and are proactive, not reactive, in regards to the assignments and grades to ensure they are on track at all times to meet their goals.

As scholars in class, it is critical that you engage yourself in the lecture material and discussions as well as the laboratory exercises. The ability to listen carefully, record information in note form, and follow directions are important skill sets required for success in higher education. Practicing these in class prepares you to study at

home where you will take the important steps toward learning the course material. This leads to the ability to retain information and describe processes on major exams. Research shows writing by hand is far more effective in obtaining long term retention than is typing! Electronic devices are allowed on non-testing days as long as they do not prevent engagement. No devices or picture taking is allowed on testing days.

As scholars, your instructor is a valuable resource for your success. I will teach to the best of my ability and provide you with a variety learning formats to help you in your effort to be successful in Biology. I deeply care about you and your academic learning experiences at Northeast Texas. Office Hours are designed for scholars to have an opportunity to get individual questions answered and engage in learning with the professor outside of class times. Take advantage of office hours as your ultimate success in the course depends solely on YOU!

#### **NTCC Academic Honesty Statement and Academic Ethics:**

"Students are expected to complete course work in an honest manner, using their intellects and resources designated as allowable by the course instructor. Students are responsible for addressing questions about allowable resources with the course instructor. NTCC upholds the highest standards of academic integrity. This course will follow the NTCC Academic Honesty policy stated in the Student Handbook." The college expects all students to engage in academic pursuits in a manner that is beyond reproach. Students are expected to maintain complete honesty and integrity in their academic pursuit. Academic dishonesty such as cheating, plagiarism, and collusion is unacceptable and may result in disciplinary action. See Student Handbook.

#### **ADA Statement:**

It is the policy of NTCC to provide reasonable accommodations for qualified individuals who are students with disabilities. This College will adhere to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations as required to afford equal educational opportunity. It is the student's responsibility to request accommodations. An appointment can be made with Shannin Garrett, Academic Advisor/Coordinator of Special Populations located in the College Connection. She can be reached at 903-434-8218. For more information and to obtain a copy of the Request for Accommodations, please refer to the [NTCC website - Special Populations](#).

#### **Family Educational Rights And Privacy Act (Ferpa):**

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education. FERPA gives parents certain rights with respect to their children's educational records. These rights transfer to the student when he or she attends a school beyond the high school level. Students to whom the rights have transferred are considered "eligible students." In essence, a parent has no legal right to obtain information concerning the child's college records without the written consent of the student. In compliance with FERPA, information classified as "directory information" may be released to the general public without the written consent of the student unless the student makes a request in writing. Directory information is defined as: the student's name, permanent address and/or local address, telephone listing, dates of attendance, most recent previous education institution attended, other information including major, field of study, degrees, awards received, and participation in officially recognized activities/sports.
